ABOUT

> *I'm a self-sufficient, results-driven software engineer who thrives in environments where the problems are hard, the stakes are high, and the coffee is strong.*

EXPERIENCE

Network Management System Specialist / Software Engineer

September 2026 – Present

Department of National Defence (DND) · Ottawa, ON

Government · Defence

Kratos Compass | C | Python | Lua | Bash | PowerShell | MariaDB | Ubuntu Linux

- Shipped new Compass monitor-and-control features for SATCOM gear, ground stations, and the crew on console.
- Wrote C drivers plus Lua and BeanShell so power, SATCOM, and ground-station hardware share one control path.
- Integrated devices over SNMP, Modbus, TCP, UDP, and HTTP into a single alarm, telemetry, and command view.
- Automated SATCOM workflows in Python, Bash, and PowerShell on Ubuntu so every shift runs the same checks.
- Kept Compass data in MariaDB on Ubuntu Linux, hosted on VMware ESXi with iDRAC out of band.
- Ran the management network with defence discipline — segmented paths, controlled access, consistent names, and deliberate change.
- Turned console procedures into software so operators supervise the network instead of hand-driving every device.

Mobile Software Developer (Contract)

February 2026 – August 2026

WebMarketers × Picis

Contract · Healthcare

TypeScript | Angular | Ionic | Capacitor

- Built & refined mobile UI components following clinical UX best practices
- Translated complex anesthesia workflows into clean, intuitive mobile screens
- Optimized component rendering for smooth performance on clinical-grade devices
- Implemented responsive, reactive data flows using Angular's powerful toolkit
- Integrated Capacitor native plugins for platform-specific device capabilities
- Debugged cross-platform rendering inconsistencies between iOS and Android
- Ensured strict TypeScript typing throughout for reliability and maintainability

Software Engineer (Full Stack)

February 2023 – February 2025

RodeoReady Ltd. · Calgary, AB

Startup

Kotlin | Objective-C | Swift | Jetpack Compose | CoreData | Room | React | MUI

- Built and shipped iOS + Android apps from the ground up — End-to-end mobile presence for the RodeoReady platform
- Delivered full React TypeScript web application — Complete web platform for rodeo event management
- Architected and deployed AWS Serverless backend (Lambda, API Gateway, AppSync, DynamoDB, SNS, SQS) — Cost-effective, auto-scaling cloud infrastructure with IaC and least-privilege IAM
- Implemented real-time WebSocket layer — Live data updates for time-sensitive rodeo events
- Managed AWS IAM with least privilege — Secure, compliant cloud account governance
- Maintained Swagger + Confluence docs — Reduced onboarding friction and improved team velocity
- Mentored team members + led code reviews — Elevated overall team code quality and standards

Software Engineer / Technical Lead

October 2018 – February 2023

Canada Border Services Agency (CBSA) · Ottawa, ON

Government

Java 8 | JEE | Typescript | Javascript | Python | Spring Boot | Hibernate | JSF

- Maintained 8 major Java enterprise applications simultaneously across Spring Boot, Hibernate, JEE, and Pub/Sub architectures.
- Designed and deployed AWS Serverless architecture for Secure Corridor — Lambda, API Gateway, DynamoDB, Kinesis, and SQS for real-time border event processing.
- Architected infrastructure-as-code with AWS CDK (Python/TypeScript) and automated CI/CD via CodePipeline, CodeBuild, and CodeDeploy across environments.
- Led multiple major release cycles with full impact analysis, coordinated across cross-functional teams.
- Championed TDD across the team using JUnit and Jest.
- Mentored developers, conducted code reviews, and participated in technical hiring panels.
- Participated in 24/7 on-call production support with direct client communication.

Freelance IT Systems Consultant

May 2025 – Present

Independent IT Consultant

Consulting

- Successfully migrated 3 businesses to cloud platforms (2 to Microsoft 365, 1 to Google Workspace)
- Configured and maintained secure cloud email systems with 99.9% uptime
- Implemented Intune MDM for device management across multiple client organizations
- Strengthened email security posture (SPF/DKIM/DMARC compliance across all deployments)
- Managed Wix, WordPress, and DNS hosting setups for client web presence
- Deployed secure network infrastructure with properly segmented public/private networks
- Optimized dual-band WiFi configurations for performance and device compatibility

FILL BEFORE SHARING

[Phone Number]
[Email Address]
[Address / City]

LANGUAGES

English | French (Bilingual)

SKILLS

PROGRAMMING

C | Python | Lua | Bash | PowerShell | TypeScript | Java | Kotlin

MOBILE

Ionic + Angular | Capacitor | Jetpack Compose | CoreData/Room | APNS/FCM

FRONTEND / BACKEND

React | Angular | Node.js | Spring Boot | GraphQL | Express

CLOUD & SYSTEMS

Kratos Compass | MariaDB | Ubuntu | SNMP | VMware ESXi | AWS Lambda

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Computer Engineering & Technology
- AWS Security Essentials
- AWS CDK Primer
- Architecting on AWS
- Developing on AWS
- Security Engineering on AWS
- Next.js
- Jetpack Compose

EDUCATION

Algonquin College

Advanced Diploma — Computer Engineering and Technology (Computer Science)

September 2017 – December 2020 | Honors | GPA: 3.77 / 4.00
