ABOUT

I'm a self-sufficient, results-driven software engineer who thrives in environments where the problems are hard, the stakes are high, and the coffee is strong. ☕

EXPERIENCE

Mobile Software Developer (Contract)

Feb 2025 – Present

WebMarketers x Picis

Contract · Healthcare

TypeScript Angular Ionic Capacitor

- Built & refined mobile UI components following clinical UX best practices
- Translated complex anesthesia workflows into clean, intuitive mobile screens
- Optimized component rendering for smooth performance on clinical-grade devices
- Implemented responsive, reactive data flows using Angular's powerful toolkit
- Integrated Capacitor native plugins for platform-specific device capabilities
- Debugged cross-platform rendering inconsistencies between iOS and Android
- Ensured strict TypeScript typing throughout for reliability and maintainability

Software Engineer (Full Stack)

February 2023 – February 2025

RodeoReady Ltd. · Calgary, AB

Startup

Kotlin Objective-C Swift Jetpack Compose CoreData Room React MUI

- End-to-end mobile presence for the RodeoReady platform
- Complete web platform for rodeo event management
- Cost-effective, auto-scaling cloud infrastructure
- Live data updates for time-sensitive rodeo events
- Secure, compliant cloud account governance
- Reduced onboarding friction and improved team velocity
- Elevated overall team code quality and standards

Software Engineer / Technical Lead

October 2018 – February 2023

Canada Border Services Agency (CBSA) · Ottawa, ON

Government

Java 8 JEE Typescript Javascript Python Spring Boot Hibernate JSF

- Maintained 8 major Java enterprise applications simultaneously across Spring Boot, Hibernate, JEE, and Pub/Sub architectures.
- Led multiple major release cycles with full impact analysis, coordinated across cross-functional teams.
- Implemented full CI/CD pipelines using AWS CodePipeline, CodeBuild, and CodeDeploy.
- Deployed cloud infrastructure using AWS CDK across multiple environments.
- Championed TDD across the team using JUnit and Jest.
- Mentored developers, conducted code reviews, and participated in technical hiring panels.
- Participated in 24/7 on-call production support with direct client communication.

SKILLS

LANGUAGES

TypeScript JavaScript Java
Kotlin Python Swift Obj-C
C

MOBILE

Ionic + Angular Capacitor
Jetpack Compose CoreData/Room
APNS/FCM

FRONTEND / BACKEND

React Angular Node.js
Spring Boot GraphQL Express

CLOUD & DATABASES

AWS Lambda AWS CDK
AppSync DynamoDB SQS/SNS
MySQL

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Computer Engineering & Technology
- AWS Security Essentials
- AWS CDK Primer
- Architecting on AWS
- Developing on AWS
- Security Engineering on AWS
- Next.js
- Jetpack Compose

EDUCATION

Algonquin College

Advanced Diploma — Computer Engineering and Technology (Computer Science)

September 2017 – December 2020 |
Honors | GPA: 3.77 / 4.00

Fun fact: My code secures Canada's borders, wrangles rodeo cowboys, and helps surgeons in the OR. 🌟👨‍🔧🏥
