PROFESSIONAL SUMMARY

I'm a self-sufficient, results-driven software engineer who thrives in environments where the problems are hard, the stakes are high, and the coffee is strong. ☕

PROFESSIONAL EXPERIENCE

Mobile Software Developer (Contract)

Feb 2025 – Present

WebMarketers × Picis

Technologies: TypeScript, Angular, Ionic, Capacitor

- Built & refined mobile UI components following clinical UX best practices
- Translated complex anesthesia workflows into clean, intuitive mobile screens
- Optimized component rendering for smooth performance on clinical-grade devices
- Implemented responsive, reactive data flows using Angular's powerful toolkit
- Integrated Capacitor native plugins for platform-specific device capabilities
- Debugged cross-platform rendering inconsistencies between iOS and Android
- Ensured strict TypeScript typing throughout for reliability and maintainability

Software Engineer (Full Stack)

February 2023 – February 2025

RodeoReady Ltd. | Calgary, AB

Technologies: Kotlin, Objective-C, Swift, Jetpack Compose, CoreData, Room, React, MUI

- End-to-end mobile presence for the RodeoReady platform
- Complete web platform for rodeo event management
- Cost-effective, auto-scaling cloud infrastructure
- Live data updates for time-sensitive rodeo events
- Secure, compliant cloud account governance
- Reduced onboarding friction and improved team velocity
- Elevated overall team code quality and standards

Software Engineer / Technical Lead

October 2018 – February 2023

Canada Border Services Agency (CBSA) | Ottawa, ON

Technologies: Java 8, JEE, Typescript, Javascript, Python, Spring Boot, Hibernate, JSF

- Maintained 8 major Java enterprise applications simultaneously across Spring Boot, Hibernate, JEE, and Pub/Sub architectures.
- Led multiple major release cycles with full impact analysis, coordinated across cross-functional teams.
- Implemented full CI/CD pipelines using AWS CodePipeline, CodeBuild, and CodeDeploy.
- Deployed cloud infrastructure using AWS CDK across multiple environments.
- Championed TDD across the team using JUnit and Jest.
- Mentored developers, conducted code reviews, and participated in technical hiring panels.
- Participated in 24/7 on-call production support with direct client communication.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Kotlin, Python, Swift, Objective-C, C

Mobile Development: Ionic + Angular, Capacitor, Jetpack Compose, CoreData, Room, APNS, FCM

Frontend & Backend: React, Angular, Node.js, Spring Boot, GraphQL, Express, Flask

Cloud & Infrastructure: AWS Lambda, AWS CDK, AppSync, DynamoDB, SQS, SNS, Kinesis, Jenkins

Databases: MySQL, PostgreSQL, MongoDB, DynamoDB, Amazon RDS

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Computer Engineering & Technology
- AWS Security Essentials
- AWS CDK Primer
- Architecting on AWS
- Developing on AWS
- Security Engineering on AWS
- Next.js
- Jetpack Compose

EDUCATION

Algonquin College

Advanced Diploma — Computer Engineering and Technology (Computer Science)

*September 2017 – December 2020 | **Honors | GPA: 3.77 / 4.00***
